Regarding claim 3, Merriam further teaches the step of determining a second message comprises the steps of: sending the mode with an identification of the mobile device to a service provider (see column 6, lines 32-45), and determining the second message based on the received mode and the identification of the mobile device on the service provider (also see column 6, lines 32-45).

Regarding claims 4 and 10, Merriam further teaches modifying at least one attribute of gear and apparel (see column 1, line 56 to column 2, line 7).
